

M61A IP-system phone for MidiStar FLASH-4 and FLASH-8

Part number 2407

High-end feature phone with LAN connectivity

The M61A IP-system phone with 4-line display provides feature telephony over a local area computer network (LAN).

The IP-system phone is equivalent to the M21system phone and has the same features (part number 2420 and 2421) when used with the FLASH-4 or FLASH-8 systems configured as a Hybrid-PBX (ISDN-System with LAN-Interface) or as LAN-PBX.

An additional Ethernet port on the phone enables the easy connection of a PC-workstation to the local network. That way your PC and system phone can be used with only one LAN-port on the network.

Highlights

- Same features as the system phone M21A
- Integrated Ethernet interface for a PC workstation
- DHCP-Client
- Power feed by power over LAN, power supply unit optionally (part number 2525)
- Voice compression on board

Technical Notes

Dimensions packaged max. 265 x 220 x 80 mm		Weight: max. 1 kg
Interfaces	Voice Encoder	Echo Cancelling
<ul style="list-style-type: none"> • 2 Ethernet-Ports 10/100 Base-T - integrated Hub (Switch¹) • Power supply - Power over LAN (optionally) • Handset-port • Headset-port ¹ in preparation 	<ul style="list-style-type: none"> • Integrated DSP • Voice Activity Detection (VAD) • Comfort Noise Generation (CNG) • Dynamic Jitter Buffer • G.711 • G.723, G.729a/b prepared 	<ul style="list-style-type: none"> • G.165

Additional Features
